

AMENDMENTS TO THE SPECIFICATION

Please replace Paragraph [0039] with the following paragraph rewritten in amendment format:

[0039] If the user for example wants to activate a menu item 34 of sub-menu level 2, he first has to select and activate menu item ~~HM4~~ HM1 in the main menu level. As a result, the subordinated menu items 1, 2 of the sub-menu 1 are displayed on the monitor 16. By means of the rotary/push button 18, the user selects now menu item 1 and activates it by pushing the rotary/push button so that both menu items 34 and 36 are now displayed for selection on the monitor 16. The user then again rotates the rotary/push button in order to move the cursor to menu item 34 and subsequently pushes the rotary/push button 18 to activate menu item 34.
